*Amazon – Raised Up Sky* is an augmented reality artwork that explores the interconnectivity of humans and nature, a groundbreaking fusion of art and science placing the viewer in the heart of the Amazonian rainforest. Through conversations with indigenous leaders, scientists and artists, Michael explores our physical, biological, and cultural link to trees. Experience the augmented reality work in development and watch a short documentary following his process in this artist talk with Joseph Michael. *Amazon – Raised Up Sky* has been made possible by the Latin America Centre of Asia Pacific Excellence.
